## 10. What are the different fund options available?

There are two funds – Equity1 and Debt1 Fund, available under this plan. All your premiums (net of charges) are allocated under the Equity1 Fund and/or Debt1 Fund. You will have the option to opt for Automatic Trigger Based Investment Strategy (ATBIS) while applying for the plan.

Fund Name	What does the Fund do?	Asset Allocation			Risk Profile
		Equity	Debt	Money Market	
Equity1 (SFIN: ULIF 009010910 EQUY1FUN D143)	Aims to high real rate of return in the long term by investing more in equity investments. There is a high probability though, of negative returns particularly in the short term.	80% to 100%	0%	0% to 20%	High
Debt1 (SFIN: ULIF 010010910D EBT01 FUND143)	Aims to investment returns that exceed the rate of inflation in the long term. There is a low probability of negative returns in the short term.	0%	70% to 100%	0% to 30%	Medium

## 11. How does the plan work?

- Every premium (new business or renewal) is allocated to Equity1 Fund and/or Debt1 Fund after deducting allocation charge
- In case you have opted for Automatic Trigger Based Investment Strategy (ATBIS) and have invested your funds in Equity1 Fund we will automatically transfer the earnings on your investment in Equity1 Fund to Debt1 Fund based on a predefined trigger rate of 10%
- In respect of investment in Equity1 Fund, at the end of each day we will check each customer account to see if the simple absolute return on the net amount of money invested in the Equity1 Fund (after allowing for Premium Allocation Charge, Policy Administration Charge, Mortality Charge, switch in and switch out) has crossed a target rate of 10%. In case the return is 10% or higher, the amount equal to the appreciation will be transferred to the Debt1 Fund. i.e. if the value of units in the Equity1 Fund is more than 10% of the net amount invested in Equity1 Fund, the absolute amount equal to the appreciation will be shifted to the Debt1 Fund

- For example:

Transaction Details	₹
Total Premium Paid under Equity1 Fund	30,000
Less	
1 Assumed Total Allocation Charge deducted from the Equity1 Fund	2,010
2 Assumed Total Mortality Charge deducted from the Equity1 Fund	1,050
3 Assumed Total Policy Administration Charge deducted from the Equity1 Fund	540
Net amount lying in the Equity1 Fund	26,400

- Let us assume that the fund value is now ₹29,760 which is higher than 110% of the net amount in the Equity1 Fund. In such a case, Rs. 3,360 (₹29,760- ₹26,400) will be transferred to Debt1 Fund through the automatic trigger based transfer
- Thus, the customer will be able to enjoy and secure up to a certain extent the upswings in fund value due to market linked performance of the Equity1 Fund by switching the gains from the equity fund to a relatively safe fund
- The customer will have the flexibility to cancel the automatic trigger based transfer option for future transactions after duly informing the Company through a formal request

## 12. How do you move from one fund to another?

You can move from one fund to another by switching your premium. Switching is not allowed in case the life assured is less than 18 years old
